DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The two story, semi-detached double residence has a surface construction of stretcher bond laid brick. To differentiate between the homes, each has been painted a different color.

Both the first and second story windows have a segmental, fan arch overhead and are two sash with mullion, double hung, l/l construction. Radiating voussoirs and alternating recessed brick patternwork complete the design.

Separating the first and second story windows are rectangular block designs. Between the windows of first story is a square with regular indented divisions. The recessed brickwork in a square format comes between the second story windows.

The boxed, double mansard cornice projects above the roof line and is decorated with small brackets and larger consoles. These also serve to hold the raised decorated moulding in place. Jigsaw design-work is found in the pediment of each mansard facade.

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

The segmental arch windows, bracket and console design, patterned brickwork and mansard roof cornice reinforce the visual significance of the structure and help to set it apart from the standard, semi-detached residence. The building is part of the first development in Waverly which was responsible for constructing summer homes and year-round residences. Homes of this particular size and related design can be found in the smaller side streets bordering Greenmount Avenue.
